ALEMU GETU ADANE

JUNIOR FULL-STACK DEVELOPER

Gondar, Ethiopia | +251 984948785 | alemugetu78@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Motivated 4th-year Computer Science student at the University of Gondar and junior full-stack developer with hands-on experience building real-world, production-style web applications. Strong foundation in front-end and back-end development, database design, RESTful API design and testing, and version control. Passionate about building scalable, user-focused software solutions and solving real-world problems through technology.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, NestJS, Django, RESTful APIs

Databases: PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Postman, OpenAPI / Swagger

PROJECTS

STORE.ETHIO — Full-Stack E-Commerce Marketplace Platform

Personal Project

- Built a production-ready, full-stack e-commerce marketplace enabling hierarchical product browsing, cart and wishlist management, secure checkout, live order tracking, and self-service user profiles.
- Designed role-based admin dashboards for managing products, inventory, categories, and financial transaction reviews.
- Solved local checkout friction by integrating Ethiopia's Chapa payment gateway (mobile money & bank transfers) alongside Stripe, using server-to-server webhook verification and race-condition-protected inventory fulfillment with PostgreSQL's select_for_update().

Tech Stack: React 19, Vite, Tailwind CSS, TanStack Query, React Router, Axios, React Hook Form | Django 5, Django REST Framework, SimpleJWT, PostgreSQL | Chapa API, Stripe | Cloudinary | Render, Vercel

GitHub: github.com/alemugetu/E-commerce

PulseDesk — Multi-Tenant Incident & Escalation Operations Platform

Personal Project

- Developed a multi-tenant incident management platform allowing teams to create, assign, track, escalate, and resolve operational incidents end-to-end.
- Implemented organization-level role-based access control (RBAC), SLA management, escalation policies, real-time updates, and audit logging.
- Built real-time collaboration and notifications using Django Channels (WebSockets), Celery, and Redis, with API documentation via drf-spectacular (OpenAPI/Swagger).

Tech Stack: React, TypeScript, Vite, Tailwind CSS, TanStack Query, Zustand, React Router, Vitest | Django, Django REST Framework, PostgreSQL, JWT, Celery, Redis, Django Channels

Live Demo: pulsedesk-flax.vercel.app

Blood Bank Management System — MERN Stack

Personal Project

- Developed a full-stack system to streamline donor records, blood inventory, and request management, reducing data entry time by 20% through robust CRUD operations.
- Built secure RESTful APIs with JWT authentication and logging middleware to ensure data integrity and access control, tested via Postman.
- Integrated real-time low-stock notification alerts, improving response times by 15%, with a MongoDB schema supporting complex donor–blood type–hospital relationships.

Tech Stack: MongoDB, Express.js, React, Node.js, JWT, Postman

GitHub: github.com/alemugetu/BooldBankManagement

Note-Taking Application — MERN Stack

Personal Project

- Built a responsive note-taking application enabling users to create, edit, and organize notes with secure, authenticated access.
- Integrated a React frontend with an Express.js backend for seamless data flow, applying clean, component-based UI design and robust API error handling.

Tech Stack: MongoDB, Express.js, React, Node.js
